## Q1. Looping statements

### CODE

```
#include <stdio.h>
int main()
{
    int num, rev=0, rem;
    printf("Enter the number:\n");
    scanf("%d", &num);
    while(num != 0){
        rem = num % 10;
        rev = rev * 10 + rem;
        num = num / 10;
    }
    printf("%d", rev);
    return 0;
}
```

### INPUT

## Q2. Looping statements

### CODE

```
#include <stdio.h>
int main()
{
    int num,temp,rev=0,rem;
    printf("Enter the number:\n");
    scanf("%d",&num);
    temp=num;
    while (num!=0){
        rem=num%10;
        rev=rev*10+rem;
        num=num/10;
        break;
    }
    if(temp==num){
        printf("It is a palindrome");
    }
    else
        printf("It is not an palindrome");

    return 0;
}
```

### Q3. Looping statements

#### CODE

```
#include <stdio.h>
int main()
{
    int num,original,remainder,sum=0;
    printf("Enter a number:\n");
    scanf("%d",&num);
    original=num;
    while (num!=0){
        remainder = num%10;
        sum=sum+(remainder*remainder*remainder);
        num=num/10;
    }
    if (sum==original)
        printf("%d is an armstrong number",original);
    else
        printf("%d is not an armstrong number",original);
    return 0;
}
```
